

Leadership Brand 360 Survey: **Excerpts from the Results Report**

After completing the *Leadership Brand 360 Survey*, participants receive rich quantitative and qualitative career feedback from their selected respondents. The comprehensive version of the report includes:

1. A valuable "business reputation snapshot" defining the characteristics that respondents tend to associate with the participants
2. Specific rankings from respondents on 9 key brand attributes of the participants
3. Verbatim comments from respondents (still anonymous) to probing questions about the participants' unique value propositions
4. Targeted development suggestions for closing gaps in each of the key brand attribute areas, allowing participants to customize their action plans

This sample contains **excerpts only** from the first three sections of a typical report.

Organizational Challenges:

1. Of the problems or "pain points" faced by this leader, which ones are they most gifted at solving? (Examples: Reframing complex data into simple and useable formats; transforming low-performing teams into more productive groups; igniting change)

Organizing cross functional teams to tackle an issue

Putting forward solutions that are innovative and have a high probability of being successful as they are based on sound experiences

Reframing complex data into simple and useable formats. I know it is a cut an paste from the question, but it is quite true for Carlos. From an outsider's perspective, he handles managing a team of veteran people very well.

Strongly and consistently promotes and supports efforts to remove barriers to achieving improved results, including the elimination of non-value-added work, serving as a role model and example to others

2. What tactical tips would you recommend to improve the effectiveness of the person requesting your feedback?

Focus on the the select few challenges vs. the many task orientated challenges. Provide a clear vision, strategy and plan for the select few. The organization will always demand more that your team can deliver (which is a good thing) BUT the select few challenges are the ones that must be successful in order to make the team stand out.

Manage meeting time and conversation length.

Thinking out of box, don't stick on the existing process/guidance.

Listen to the needs of the customer. Look at new ways of improving the data.

Effectively facilitates open discussions on issues and sets clear ground rules and allows enough time for all to weigh in to ensure everyone's viewpoint is heard and understood

Understanding what management peers are driving for cross team efforts. This would help to drive the message to the team on changes being made across the quality organization.
